

THE NOVA COMBOS SUN COLLECTION

– PERFECT COMBINATION OF
FASHION AND TECHNOLOGY

NOVA COMBOS SUN - FOR WOMEN

Step out in style with Nova Combos Sun, sunglasses designed especially for wearers of prescription eyewear. There's a wide range to choose from as the collection offers all kinds of shapes such as rectangles, ovals, rounds and oversized frames with a good choice of equally trendy colours and designs.

Most importantly, these come from the house of Vision Rx Lab, renowned for its high end quality. These are powered sun lenses that offer 100 per cent UV protection thanks to their advanced sun lens technology. In addition the eyewear products are noted for their exceptional comfort and clarity, making them perfect for active lifestyles. Comfort, functionality and fashion have been brought together seamlessly in frames that are crafted using the finest materials of acetate, TR 90, polycarbonate, stainless steel, among others.

Wearers are spoiled for choice as the brand caters to specific needs and personal preferences. Of particular note are the various options of tints to ensure solutions for enhanced clarity and comfort. Its polarized tints with advanced polarization technology help to reduce unwanted glare, which makes for a comfortable viewing experience even in very bright conditions outdoors. The range of tints includes new mirror ones, as well as solid and gradient tints to further meet individual vision requirements.

The bold and stylish designs in the men's collection are of distinguished silhouettes, making them suitable for any occasion. The women's range too is at once decidedly contemporary to match the best of international trends with styles such as modified

butterfly shades in shiny translucent silhouettes. Youngsters will find plenty to choose from in lively colours and exciting designs.

Nova Combos Sun also presents a choice of specialty sports sunglasses in wrap-around frames—a great option with their futuristic look for those looking to make a style statement in fashion frames of the very latest designs. These are high performance products, designed to be sturdy and anti-slip.

All the products in the category are powered with Nova Sun Rx lenses which is made for a wide range of prescriptions, (from +7.00 to -7.00 including SV & PAL). The lenses offer UV protection for every age group and lifestyle. Designed as they are using the Free Form technology, the lenses offer sharper vision for various outdoor activities as they take into account the different daylight conditions. The sun lenses are in a slim fit design. Wearers can look forward to optimal precision and comfort as the conceptualisation uses an advanced calculation to create customised lenses for each individual.

This is in line with the advanced technology the Nova brand is famous for—seen across the board in its different categories of vision solutions for all age groups that also take into account particular visual requirements whether it's relief from eye fatigue, for sports, work or for driving, and progressives for different visual needs. These key elements are combined with the latest fashion trends in all Nova products, across sunglasses, frames, swimming goggles and safety eyewear.
